SAFE. SIMPLE. SMARTER EPIDURALS.
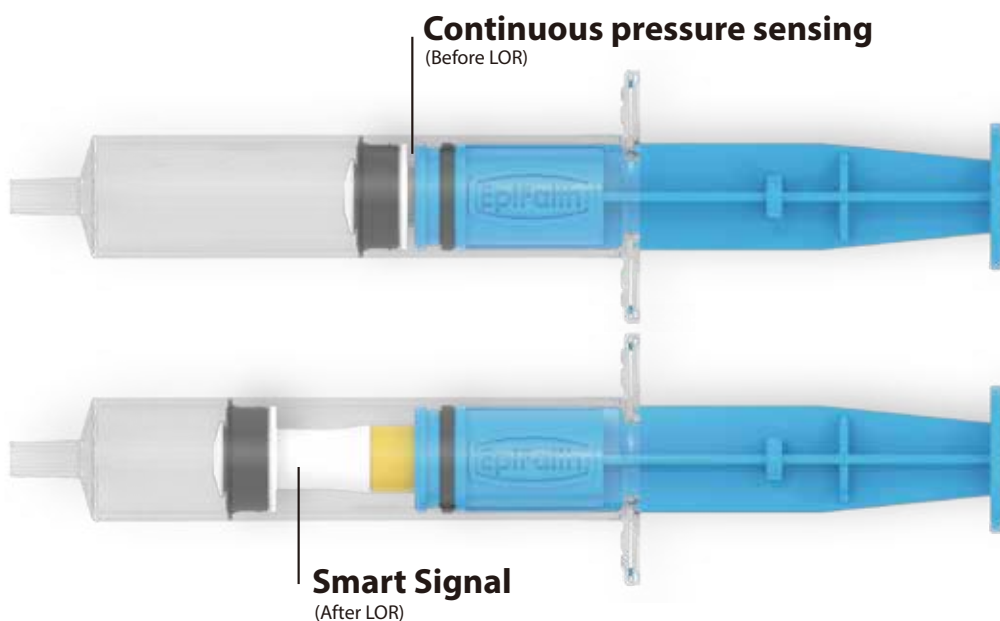

Flat Medical

See the Pressure, Enhance Safety

EpiFaith® uses an automated pressure-sensing system that delivers real-time and continuous detection—providing an objective, visual signal upon entry into the epidural space, as validated by global clinical use for enhanced safety.

Teaching Made Easy

Clear, visual feedback simplifies training and improves communication. EpiFaith helps learners focus on what matters—precise needle placement.

Continuous pressure sensing
(Before LOR)

Smart Signal
(After LOR)

All connector types—
Luer Slip, Luer Lock, and NRFit® **—are available**

Control Made Simple

With two-handed control and real-time pressure visuals, EpiFaith empowers providers to place needles with greater stability, accuracy, and safety.

PROVEN REDUCTIONS

wet tap rate	assistance needed	false positive
90.9%↓	**31.8%**↓	**60.0%**↓
compared to traditional devices	by newly qualified physician, compared to traditional devices	with saline, compared to literature reports
